

Sneak Peak of Tentative Interactive Workshop Descriptions:

Workshops organized by category below.

Skill Building Test Prep App Prep Exploring Careers in Healthcare Undefined

Category	Workshop
Skill Building	<p>Hands-On CPR</p> <p>When a person has a cardiac arrest, their survival depends on immediately getting CPR from someone nearby. CPR, especially if performed in the first few minutes of cardiac arrest, can double or triple a person's chance of survival. This Hands-Only CPR workshop taught by the UC Davis Fire Department is designed to prepare students to provide Hands-Only CPR in a safe, timely, and effective manner for adults and children.</p>
Skill Building	<p>Stop the Bleed</p> <p>The STOP THE BLEED® workshop is a class created by the American College of Surgeons. This class taught by the UC Davis Fire Department teaches the basics of identifying and treating life-threatening bleeding and current techniques used to control bleeding, including: tourniquet application, wound packing, and the use of bleeding control kits.</p>
Skill Building	<p>Knocking on Death's Door: Exploring the Vital Role of Anesthesiologists in Surgical Care</p> <p>This presentation will take an in-depth look at an emergency surgical case, concentrating on anesthesiology and the important role anesthetic interventions play in inducing successful patient outcomes.</p>
Skill Building	<p>Wilderness Medicine: Techniques Learned in the Real World</p> <p>Description coming soon!</p>
Skill Building	<p>Dietetics: Patient Centered Thinking</p>
Skill Building	<p>The Ins and Outs of Suturing With US Army</p> <p>Learn the basics of suturing after a surgery.</p>

<p>Skill Building</p>	<p>Military Working Dogs: Common injuries/emergencies CPT Peri and MAJ Kim will bring an exciting presentation on Tactical Canine Casualty Care with a live controlled bite with a military working dog team.</p>
<p>Skill Building</p>	<p>Mock Clinical Case Studies in Occupational Therapy In this session, you will learn how to "think like an OT" as you explore occupational therapy cases and utilize the Occupational Therapy Practice Framework (OTPF) to analyze activities!</p>
<p>Skill Building</p>	<p>Tackling Complex Health Problems: It Takes A Community! Participants in this workshop will (1) identify the primary community factors that influence health, (2) discuss the impact on health of a strengths-based approach in working with individuals and communities, (3) recognize the role of health professionals in promoting the health of communities, and (4) practice asset-mapping of resources in your community toward a health problem you care about.</p> <p>Facilitators of this workshop will include health experts from a variety of professions and disciplines in health care and community-based organizations. This workshop will employ a variety of interactive learning activities, including group polling and small group breakouts.</p>
<p>Skill Building</p>	<p>Performing Clinical Skills Performing Clinical Skills to include Combat Casualty Care Skills at they pertain to Military Medicine</p>
<p>Skill Building</p>	<p>Medical Scribing The workshop will consist of an initial PPT presentation on the components of a medical note and then transition into an interactive section during which participants will role play as the provider and practice writing their own medical note. They will have the opportunity to assess/question one of the speakers who is playing the role of the patient to gather a relevant history for their note and then will work together to formulate an assessment and plan. They will then present their plans before a final review of the case.</p>

<p>Skill Building</p>	<p>Foot Casting Description coming soon!</p>
<p>Skill Building</p>	<p>Introduction into PM&R and Musculoskeletal Ultrasound Description coming soon!</p>
<p>Test Prep</p>	<p>Preparing for the "Unpreparable": Situational Judgment and Competency Assessments Especially in the healthcare system, a professional career can hinge on making good decisions after considering the consequences. While situational judgment assessments are not new, more health professions programs have included these behavior-based situations to gauge whether applicants are fundamentally prepared and guided by proper ethical or moral principles consistent with professional expectations. Professional reasoning skills will be the focus of attendees to this interactive workshop that should help with interviews and school-specific essays. While there is limited capacity, this workshop welcomes all those seeking health professional career paths outside of "medicine."</p>
<p>App Prep</p>	<p>Personal Statement Review Want to have your personal statement reviewed by a qualified health professional or speaker who will offer you advice, tips, and ways to improve your personal statement? Come to this workshop!</p>
<p>App Prep</p>	<p>UCSF: Mock Dentistry Admissions Committee Activity Ever wonder what an Admissions Committee looks for? In this interactive and dynamic workshop, participants will get the opportunity to understand an admissions committee member's role by reading applications and having open dialogue regarding admissions decisions. Leaving this workshop, participants will have a better understanding of what an admissions committee looks for and can implement such a perspective when building their own application to dental school.</p>
<p>App Prep</p>	<p>Be The Dean: Learn to Review Applications with Boston University School Of Medicine Admissions</p>

	<p>Attendees will work in small groups to determine the key applicant characteristics that they would like to see in aspiring medical students. They will then work through a set of redacted applications to evaluate each of them and to determine which applicants should be admitted. We will then compare the characteristics they chose and the decisions they made to the strategies used currently at Boston University School of Medicine.</p>
<p>Exploring Careers in Healthcare</p>	<p>Introduction to Acupuncture and Related Treatments Description of what an acupuncturist and TCM is, the educational requirements, what it treats, what I have personally treated, as well as the modalities commonly used. I will discuss a day in the life and perform a demonstration of a typical treatment session.</p>
<p>Undefined</p>	<p>Tailoring Your Resume to Pre-Health Opportunities Want to learn how to write a compelling resume for pre-health opportunities? Come to this workshop to learn how to structure your resume to impress employers and work in groups to brainstorm descriptions for your current activities.</p>
<p>App Prep</p>	<p>The YOU factor: Leveraging Diversity in Applications and Interviews An interactive look at how to showcase your uniqueness throughout a holistic application and MMI process. Participants will have the opportunity to learn about what a good CAS application looks like, understand what faculty and admissions professionals are looking for in a holistic MMI experience, and practice writing meaningful personal statements to leverage their diverse backgrounds and experiences. As an added bonus, participants will have the opportunity to stay connected with faculty and admissions professionals for ongoing support in preparing for future Pharmacy admissions processes.</p>
